## Project Management Certificate Program

What Every Biotech and Pharmaceutical Project Manager Needs to Know!

### **FEATURES AND BENEFITS**

- Broad selection of courses for the project management professional
- DIA courses have earned industry acclaim as the standard for instructor-led training
- Expert instructors will teach you the necessary skills to excel in the real world
- Many courses offer continuing education credits including PMI PDUs

## What Every Biotech and Pharmaceutical Project Manager Needs to Know!

The DIA Project Management Certificate Program will teach you valuable skills to help you reduce drug development cycle time, improve product quality, and ensure cost effectiveness.

### WHY CHOOSE DIA?

DIA is an established, recognized authority in the pharmaceutical industry and has been for more than 47 years. As an independent, not-for-profit, global association of members with no corporate sponsors, DIA offers an objective program that results in an industry recognized DIA Certificate of Completion.

### WHAT YOU WILL LEARN

- · Current challenges in project management
- Planning and managing projects
- Schedule, resource, and cost management
- · Team building and communications
- Project risk management
- Drug development paradigms

### **PROGRAM REQUIREMENTS**

Students must successfully complete 56 Project Management Certificate Program (PMCP) units – 48 units from the Core and 8 units from the Electives.
